- Apply cabinet artwork

TWISTED DELUXE

REQUIREMENTS:

- Swap steering wheel
- Remove shifter & install BOOST button
- Swap some control panel buttons
- Swap computer
- Apply cabinet artwork
- Your game will not have motion once it is converted

TWISTED MOTION

REQUIREMENTS:

- Swap steering wheel
- Swap some control panel buttons
- Swap computer
- Apply cabinet artwork
- Your game will not have motion once it is converted

NASCAR TEAM RACING STANDARD

REQUIREMENTS:

- Swap steering wheel
- Remove shifter & install BOOST button
- Swap some control panel buttons
- Swap computer
- Apply cabinet artwork

NASCAR TEAM RACING DELUXE

REQUIREMENTS:

- Swap steering wheel
- Remove shifter & install BOOST button
- Swap some control panel buttons
- Swap computer
- Apply cabinet artwork

NASCAR RACING STANDARD

REQUIREMENTS:

- Swap steering wheel
- Remove shifter & install BOOST button
- Swap some control panel buttons
- Swap computer
- Apply cabinet artwork

NASCAR RACING DELUXE

REQUIREMENTS:

- Swap steering wheel
- Remove shifter & install BOOST button
- Swap some control panel buttons
- Swap computer
- Apply cabinet artwork

NASCAR MOTION

REQUIREMENTS:

- Swap steering wheel
- Remove shifter & install BOOST button
- Swap some control panel buttons
- Swap computer
- Apply cabinet artwork
- Your game will not have motion once it is converted

REDLINE RAMPAGE KIT COMPATIBILITY & REQUIREMENTS

NEED FOR SPEED CARBON STANDARD

REQUIREMENTS:

- Swap steering wheel
- Remove shifter & install BOOST button
- Swap some control panel buttons
- Swap computer
- Apply cabinet artwork

NEED FOR SPEED CARBON DELUXE

REQUIREMENTS:

- Swap steering wheel
- Remove shifter & install BOOST button
- Swap some control panel buttons
- Swap computer
- Apply cabinet artwork

NEED FOR SPEED CARBON MOTION

REQUIREMENTS:

- Swap steering wheel
- Remove shifter & install BOOST button
- Swap some control panel buttons
- Swap computer
- Apply cabinet artwork
- Your game will not have motion once it is converted

NEED FOR SPEED UNDERGROUND DEDICATED

REQUIREMENTS:

- Must replace CRT with LCD Monitor
- Must install GVRI/O PCB Kit (PN 90634-01)
- Swap steering wheel
- Remove shifter & install BOOST button
- Swap some control panel buttons
- Swap computer
- Apply cabinet artwork

NEED FOR SPEED UNDERGROUND MOTION

REQUIREMENTS:

- Must install GVRI/O PCB Kit (PN 90634-01)
- Swap steering wheel
- Remove shifter & install BOOST button
- Swap some control panel buttons
- Swap computer
- Apply cabinet artwork
- Game will not have motion once converted

NEED FOR SPEED/ NFS GT STANDARD

REQUIREMENTS:

- Must replace CRT with LCD Monitor
- Must install GVRI/O PCB Kit (PN 90634-01)
- Swap steering wheel
- Remove shifter & install BOOST button
- Swap some control panel buttons
- Swap computer
- Apply cabinet artwork

NEED FOR SPEED/ NFS GT DELUXE

REQUIREMENTS:

- Must replace CRT with LCD Monitor
- Must install GVRI/O PCB Kit (PN 90634-01)
- Swap steering wheel
- Remove shifter & install BOOST button
- Swap some control panel buttons
- Swap computer
- Apply cabinet artwork

NEED FOR SPEED/ NFS GT STANDUP

REQUIREMENTS:

- Must replace CRT with LCD Monitor
- Must install GVRI/O PCB Kit (PN 90634-01)
- Swap steering wheel
- Remove shifter & install BOOST button
- Swap some control panel buttons
- Swap computer
- Apply cabinet artwork

CABINET CONVERSION OVERVIEW

1. **If** your game has a CRT monitor, you **must** remove it and install a 720p or better LCD, LED, or Plasma HD monitor (16 X 9 aspect ratio).
(Rear projection monitors used in Global VR motion games are compatible too.)
2. **If** your game has a Nytric USB/I/O card (Need for Speed™ Underground & GT games) you will need to order a **Nytric I/O Conversion Kit, Part Number 90634-01**. (The kit contains a GVRI/O Mini PCB and Conversion Harness.)
3. Clean the cabinet and make sure everything is in good shape.
4. Swap the steering wheel for the new wheel with pre-installed buttons for firing the weapons; run the wires into the cabinet and connect. (This step is optional for games that will be operated only in Green Label Mode.)
5. **If** your game has a shifter, remove it and install a **BOOST** button in its place.
6. **If** your game has a card reader or card dispenser, you can remove it if desired (it will not be used).
7. Modify some control panel buttons by carefully prying off the lens so you can swap the lens and legend.
8. Swap the system computer for the new Redline Rampage computer.
9. Trim and install the cabinet artwork.

You can link up to four Redline Rampage games, even if they were converted from different games!
